

Comparing Fractions

- 1) Shade in the shapes and order: $\frac{1}{3}, \frac{2}{3}, \frac{1}{6}, \frac{5}{6}$

- 2) Shade in the shapes and order: $\frac{1}{12}, \frac{2}{6}, \frac{5}{12}, \frac{5}{6}, \frac{1}{6}, \frac{9}{12}$

- 3) Shade in the shapes and order: $\frac{1}{9}, \frac{3}{6}, \frac{1}{3}, \frac{2}{3}, \frac{1}{6}, \frac{7}{9}$

Now try ordering the following fractions without shading them in (you could draw them on paper or you could find the *equivalent* fractions by multiplying)

4) $\frac{2}{4}, \frac{7}{8}, \frac{2}{8}, \frac{6}{16}, \frac{3}{4}, \frac{15}{16}$

5) $\frac{1}{10}, \frac{2}{5}, \frac{5}{15}, \frac{5}{5}, \frac{6}{10}, \frac{3}{5}$
